

```
cd /srv
wget https://download.checkmk.com/checkmk/2.3.0p24/check-mk-raw-
2.3.0p24_0.bookworm_amd64.deb
sudo apt install ./check-mk-raw-2.3.0p24_0.bookworm_amd64.deb
```

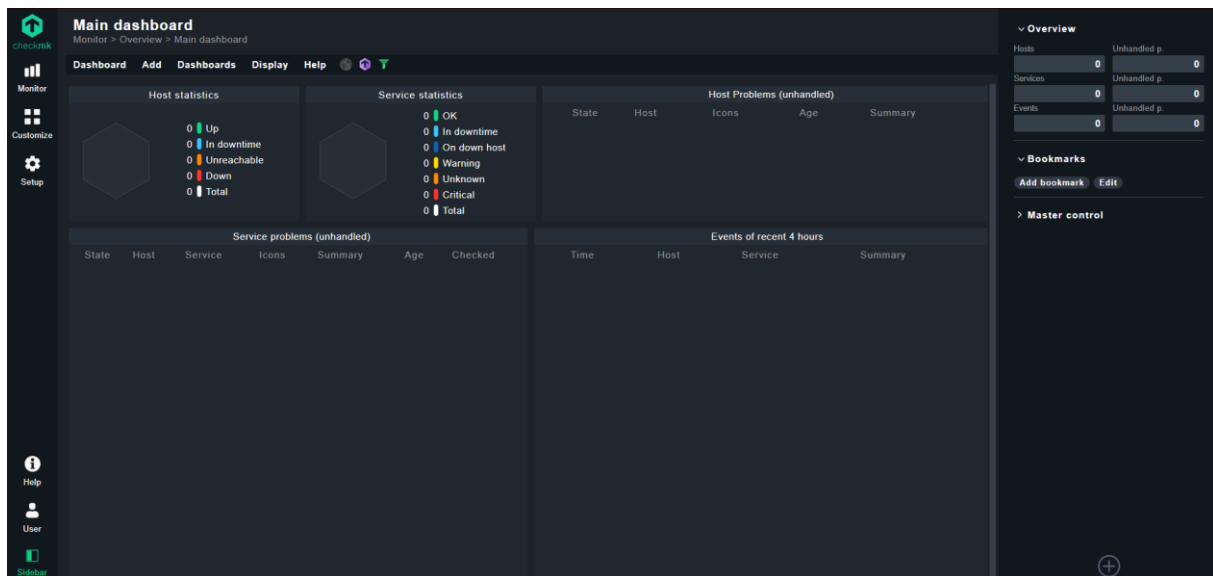

```
sudo omd create monitoring
```

The site can be started with `omd start monitoring`.
The default web UI is available at <http://ipadresse/monitoring/>

The admin user for the web applications is `cmkadmin` with password: `5IKv5Vket0gA`
For command line administration of the site, log in with `'omd su monitoring'`.
After logging in, you can change the password for `cmkadmin` with `'cmk-passwd cmkadmin'`.
`omd start monitoring`

Sur Navigateur aller <http://ipadresse/monitoring/>

une fois le monitoring fonctionnel nous allons implanter l'agents CheckMK dans une autre machine.
aller dans setup/agents/linux et copie le lien du premier package et sur l'autre machine :
wget http://192.168.48.133/monitoring/check_mk/agents/check-mk-agent_2.3.0p24-1_all.deb

The screenshot shows the 'Linux, Solaris, AIX files' page in the Checkmk setup interface. The page has a breadcrumb 'Setup > Agents > Linux, Solaris, AIX files' and a 'No pending changes' status. The left sidebar is the same as the dashboard. The main content area has tabs for Related, Display, and Help. The 'Packaged Agents' section is expanded, showing a list of agents and their sizes. The agents are grouped into several categories: /linux, /scripts, /scripts/super-server, /scripts/super-server/0_systemd, /scripts/super-server/1_xinetd, and Agents. The Agents section is expanded, showing a list of agents and their sizes.

Agent	Size
check-mk-agent_2.3.0p24-1_all.deb	4.35 MiB
check-mk-agent-2.3.0p24-1.noarch.rpm	4.46 MiB
cmk-agent-ctl	10.78 MiB
cmk-agent-ctl.gz	4.33 MiB
mk-sql	8.77 MiB
cmk-agent-useradd.sh	2.10 KiB
setup	3.44 KiB
check-mk-agent-async.service	330.00 B
check-mk-agent.socket	246.00 B
check-mk-agent.socket.fallback	559.00 B
check-mk-agent@.service	354.00 B
cmk-agent-ctl-daemon.service	797.00 B
setup	8.40 KiB
check-mk-agent	1.70 KiB
setup	3.90 KiB
check_mk_agent.aix	31.76 KiB
check_mk_caching_agent.linux	3.20 KiB
mk-job	3.43 KiB
mk-job.aix	3.20 KiB
mk-job.solaris	3.51 KiB
waitmax	13.09 KiB

sur le monitoring aller dans setup/hosts faite « Add new host », entrer le nom de la machine et l'adresse ip puis appuyer sur « Save & run service discovery ».

Add host
Setup > Hosts > Main > Add host

Host Display Help

Save & run service discovery Save & view folder Save & run connection tests Main

Basic settings show more

Host name (required) machine

Network address show more

IP address family ☐ IPv4 only (Default value)

IPv4 address 192.168.48.133

Monitoring agents show more

Checkmk agent / API integrations ☐ API integrations if configured, else Checkmk agent (Default value)

SNMP ☐ No SNMP (Default value)
