TEAMPASS

Initial installation

Teampass instance information

Absolute path to TeamPass folder

/var/www/html/TeamPass

Full URL to TeamPass

http://192.168.48.130

Absolute path to secure path

For security reasons, the secure path shall be defined outside the WWW folder of your server (example: /var/teampass/). It will host an encryption key used for several Teampass features.

/var/www/html/TeamPass

Next elements to check

- Secure folder is available ✓
- File "/includes/config/settings.php is available ✓
- Directory "/install/" is writable ✓
- Directory "/includes/" is writable ✓
- Directory "/includes/config/" is writable ✓
- Directory "/includes/avatars/" is writable ✓
- Directory "/includes/libraries/csrfp/libs/" is writable ✓
- Directory "/includes/libraries/csrfp/js/" is writable ✓
- Directory "/includes/libraries/csrfp/log/" is writable ✓
- Directory "/files/" is writable ✓
- Directory "/upload/" is writable ✓
- PHP extension "mbstring" is loaded ✓
- PHP extension "openssl" is loaded ✓
- PHP extension "bcmath" is loaded ✓
- PHP extension "iconv" is loaded ✓
- PHP extension "xml" is loaded ✓
- PHP extension "gd" is loaded ✓
- PHP extension "curl" is loaded ✓
- PHP extension "gmp" is loaded ✓
- PHP version is greater or equal to 8.1 ✓
- Execution time limit ✓

TEAMPASS

Thank you for installing **Teampass**.

The final step is now to move to the authentication page and start using **Teampass**.
The Administrator login is `admin`
Its password is the one you have written during the installation process.

Please note that first page may be longer to load. Install files and folders will be deleted for security purpose.
In case warning "Install folder has to be removed!" is shown while login, this operation has failed and requires to be done manually.

Move to home page
